

# WALK IN THE LIGHT

## South Africa

Devoted to helping meet physical and emotional needs of families in the local community where about 10,000 people live in extreme poverty; of which 60% are HIV positive and 39% unemployed. Their vision is to provide more jobs for local people. Their goal; to build a conference center overlooking the community, equipped with a medical center, preschool, and development center. Other services include:

**Transportation:** provides free transport to and from local clinics and hospitals, enabling people to be consistent with their medication, thus reducing the percentage of HIV death rate within the community.

**Food & Agriculture:** delivers food donations, provides garden space and teaches families how to grow vegetables.

**Community Engagement:** employs local community people to work various jobs, teaching them job skills and providing sustainable income.

**Service Projects:** distributes clothing donations, helps build and restore homes, provides and maintains safe environments for recreation to both young and old.

**Outreach:** conducts home visits to encourage sick people.

**Farm:** grows Rose Geranium seedlings from parent stock on the farm and harvests crops using people from the community. The factory processes Rose Geranium essential oils with the final product being a moisturizing hand & foot lotion.
